SUMMARY

Senior QA Automation Engineer with 11+ years across mobile, web and API testing, including five years at Finnish product companies. Held final release sign-off for the AlphaSense mobile apps on the App Store and Google Play. Builds automation frameworks from scratch in TypeScript and Java (Playwright, WebdriverIO, Appium, XCUITest, Espresso, Selenide) and wires them into CI/CD as release gates. Experienced in coaching and mentoring QA engineers in Finland and Vietnam.

EXPERIENCE IN FINLAND

2020 – 2026

AlphaSense Oy, Senior Quality Engineer

2026

AI-powered market intelligence and search platform for financial and corporate professionals.

- Owned release testing and final sign-off for the AlphaSense mobile apps before App Store and Google Play deployment.
- Automated native iOS and Android testing with XCUITest and Espresso, alongside cross-platform Appium suites.
- Reviewed Playwright + TypeScript front-end and service-test code from web and backend teams.
- Acted as a key technical contact for troubleshooting and resolving high-priority customer issues.

AlphaSense Oy, Senior Mobile QA Engineer

Feb 2022 – 2025

- Held final sign-off authority for weekly AlphaSense and Stream mobile releases before App Store and Google Play deployment.
- Led mobile QA in a product team of 9 (3 QAs, 6 devs), defining a functional, regression and performance test strategy that cut post-release defects by 20%.
- Architected mobile automation with Appium and Selenide on TestNG: 100+ automated tests running a full regression in under an hour on CircleCI, reported in Allure TestOps.
- Added API, contract and performance tests (k6, JMeter) for the backend services behind the mobile apps.
- Enabled other service teams to trigger mobile automation runs themselves, speeding up cross-team pipelines.
- Used Playwright service-test results as release gates in the mobile sign-off process, verifying backend readiness before store submission.
- Coached and mentored junior QA engineers on testing and automation practices.
- Acted as a key technical contact for the sales team on high-priority client issues.

Smarp Oy, Technical QA Engineer

2020 – 2022

Employee communication and advocacy platform.

- Played a key role in go/no-go release decisions across iOS, Android and Web.
- Enhanced and maintained a unified automation framework: Selenium/Selenide for web UI, Appium for native mobile, RestAssured for APIs.
- Added new automated tests, increasing coverage by 30% and reducing manual testing effort.

- Named “QA of the Year” 2020.

EXPERIENCE IN VIETNAM

2014 – 2020

ShopBack, Senior QA Engineer

2019 – 2020

Sole QA engineer for the core backend team of a cashback platform operating across Asia-Pacific. Built a multi-platform automation framework from scratch (Selenium, Appium, custom Java API libraries, Cucumber BDD) that automated 80%+ of CRM regression. Ran API tests in CI and k6/JMeter load tests on AWS/GCP test infrastructure, led test planning for launches in seven countries, and trained other QA engineers on the framework.

Axon Global, Senior QA Engineer

2018 – 2019

Improved a Python + Selenium framework to cover integration tests between camera hardware and the Evidence.com web application, increasing automation coverage and reducing manual testing.

Hansen Technologies, Senior QA Engineer

2017 – 2018

Built the Vietnam QA team from zero, took a Selenium + C# automation framework from proof of concept to production use, and mentored new automation engineers.

NashTech Global, Software QC Engineer

2015 – 2017

Extended a C# Selenium + SpecFlow BDD framework and ran manual testing for Adslot, an advertising trading platform.

Gameloft, Mobile QA Engineer

2014 – 2015

Tested new builds of *Asphalt 7* and *Order & Chaos* and onboarded new QA team members.

SKILLS

Programming	TypeScript, JavaScript, Java, Python, C#
Mobile	Appium, XCUITest, Espresso, WebdriverIO
Web and API	Playwright, Selenium, Selenide, RestAssured, Postman, API and contract testing
Performance	k6, JMeter
Test frameworks	TestNG, PyTest, Cucumber, SpecFlow
CI/CD and cloud	GitHub Actions, CircleCI, Jenkins, GoCD, TeamCity, Bitrise, Docker, AWS, GCP
Databases	SQL, PostgreSQL, MongoDB
Tools	Allure TestOps, BrowserStack, SauceLabs, Testkube, GitHub, GitLab, Bitbucket

LANGUAGES

Vietnamese (native)
English (professional working)

EDUCATION

NIIT, Vietnam
BSc, Information Technology
2008 – 2011

AWARDS

QA of the Year, Smarp Oy (2020)
Agile Leadership, Axon Active (2017)

PORTFOLIO

My own Playwright + TypeScript framework for the OrangeHRM demo app: UI and API tests, smoke and regression tags, cross-browser runs and Allure reports, running in GitHub Actions.
