

Pham Quang Quoc Viet (William)

SUMMARY

A highly motivated and experienced Lead Mobile QA Engineer with over a decade of experience in ensuring the quality of software products. Proven ability to lead QA teams, develop and implement automation frameworks, and collaborate with cross-functional teams to deliver high-quality products. Seeking to leverage my experience in building automation frameworks and leading QA teams to establish and grow a high-performing quality assurance organization from the ground up.

EXPERIENCE

Alphasense Oy, Finland – *Lead Mobile QA Engineer*

An AI-powered market intelligence and search platform for financial and corporate professionals. (2025 ARR: \$400M+)

Product Team Size: 9 (3 QAs, 6 Devs)

2022 – 2025

- Held final sign-off authority for all Alphasense and Stream mobile app release candidates, determining their readiness for production deployment to the App Store and Google Play.
- Led a team of QA engineers, establishing a comprehensive test strategy that included functional, regression, and performance testing, resulting in a 20% reduction in post-release defects.
- Architected and implemented automation solutions using Appium for mobile testing and Selenide, integrated within a TestNG Framework, AllureTestOps, and CircleCI.
- Proactively collaborated with multiple service teams to coordinate testing efforts, speeding up the pipeline by adding the capability to allow other teams to trigger mobile automation tests by themselves easily.
- Coached and mentored junior QA engineers, providing guidance on best practices for testing and automation.
- Acted as a key point of contact for the sales team to troubleshoot and resolve high-priority client issues.

Smarp Oy, Finland – Technical QA Engineer

An employee communication and advocacy platform designed to help companies share news and content with their workforce. (Est. Annual Revenue: \$38.4M)

Product Team Size: 10 (2 QAs, 8 Devs)

2020 – 2022

- Played a key role in the go/no-go decision-making process for product releases across iOS, Android, and Web platforms.
- Enhanced and maintained the existing unified automation test framework, utilizing Selenium/Selenide for web UI, Appium for native mobile applications, and RestAssured for API validation.
- Implemented new automation test scripts, increasing test coverage by 30% and reducing manual testing efforts.
- Recognized as "QA of the Year" in 2020 for outstanding contributions to the quality of the Smarp platform.

ShopBack, Vietnam – Senior QA Engineer

A leading cashback and rewards platform in the Asia-Pacific region, allowing users to get a percentage of their money back on online purchases. (FY2023 Revenue: \$87.7M)

Product Team Size: 7 (1 QA, 6 Devs)

2019 – 2020

- Served as the sole QA engineer for the core backend team, responsible for the quality of the internal CRM tool that controlled the UI for all Desktop Web, Mobile Web, and Mobile App platforms.
- Built a new, multi-platform automation test framework from the ground up, leveraging Selenium for web, Appium for mobile, and custom Java libraries for API testing within a Cucumber BDD structure.
- Took a lead role in deploying the company's products to seven countries, developing and executing the test plan for each international launch.
- Trained and coached other QA engineers on the use of the new framework and best practices for automation testing.

Axon Global, Vietnam – Senior QA Engineer

A technology company developing connected devices, software, and evidence management solutions for law enforcement. (2024 Revenue: \$2.1B)

Squad Team Size: 7 QAs

2018 – 2019

- Improved the existing Python-based automation test framework, using Selenium to support complex integration tests between camera hardware and the Evidence.com desktop web application.
- Increased automation test coverage by implementing new test scripts, reducing the need for manual testing.
- Contributed to the company's knowledge-sharing initiatives by creating and presenting technical documentation.

Hansen Technologies, Vietnam – Senior QA Engineer

A global provider of billing software and customer care solutions for the energy, utilities, and communications industries. (2024 Revenue: \$230M)

QA Team Size: 9 QAs

2017 – 2018

- Implemented and demonstrated a proof of concept for a new automation framework for the company's latest projects using Selenium with C#.
- Coached and mentored new automation QA engineers on the team.
- Build up the Vietnam QA team from zero
- Designed and developed an automation framework based on customer requirements.
- Collaborated with clients to clarify requirements and ensure the quality of the project.

NashTech Global, Vietnam – Software QC Engineer

2015 – 2017

- Created and executed manual test cases for the Adslot digital advertising platform.
- Enhanced the existing C# automation test framework, which utilized Selenium and SpecFlow for BDD.

Gameloft, Vietnam – Mobile QA Engineer

2014 – 2015

- Maintained the quality of new builds for popular mobile games such as Order & Chaos and Asphalt 7 by performing manual integration testing.
- Coached and shared knowledge with new team members to ensure a consistent level of quality.

EDUCATION

NIIT, Vietnam – Bachelor of Science in Information Technology

2008 – 2011

GPA: 2.93/4

SKILLS

Programming Languages: Java, Python, C#

Testing Frameworks: Selenium, Appium, TestNG, Selenide, Playwright, Cucumber, SpecFlow, RestAssured

CI/CD: Jenkins, CircleCI, GoCD, TeamCity

Databases: SQL, NoSQL (MongoDB)

Tools: Postman, BitBucket, BrowserStack, Allure TestOps, Testkube, Gitlab, Github, Travis CI, SauceLab

Testing Skills: Manual Testing (Mobile, UI, API), Automation Testing

AWARDS

Agile Leadership, Axon Active (2017)

QA of the Year, Smarp Oy (2020)
